

Design. Build. Maintain.

Dear New Homeowner,

Congratulations on your new home! We hope everything is coming together nicely as you make it feel like home.

My name is **Rob Hofmann**, Sales Designer with **Waukesha Lawn Service**. I work with homeowners who want their outdoor spaces to feel just as thoughtful, welcoming, and well-finished as the home they've worked so hard to build.

We understand that new construction often leaves outdoor spaces unfinished or temporary, and it can be hard to know where to start. Our role is to make that process simple and enjoyable—whether you're envisioning a healthy, green lawn, well-designed planting beds, or a complete outdoor living space for relaxing and entertaining.

At Waukesha Lawn Service, we focus on designs that complement your home, fit your lifestyle, and add long-term value. Our team takes the time to listen, plan carefully, and execute with attention to detail so your landscape feels intentional—not rushed or generic.

Our services for new construction and landscape installation clients include:

- **Custom landscape design tailored to your home, lot, and long-term vision**
- Planting installations that enhance curb appeal and usability
- Paver patios and retaining walls designed for function and style
- New lawn installation
- Drainage solutions to protect your investment and manage water effectively
- **0% interest financing on new landscape installations (available through March 1st)**

To help you get started, we offer a **free, no-obligation consultation**. I'd be happy to walk your property, talk through ideas, and provide recommendations tailored to your goals and timeline.

Our team is already helping home owners in your area we would love the opportunity to help make your new house feel even more like home.

With warm regards,

Rob Hofmann
